Rules on letting this property

Properties can be let if they have an energy rating from A to E.

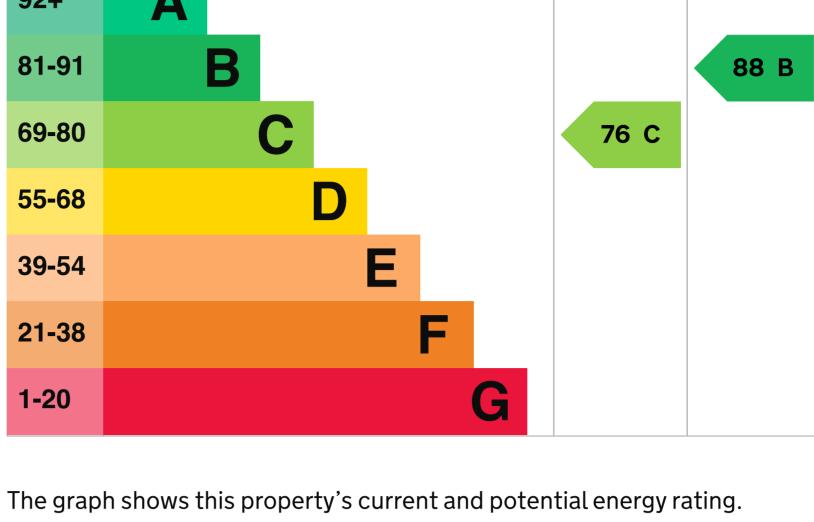

You can read guidance for landlords on the regulations and exemptions.

This property's energy rating is C. It has the potential to be B.

Energy rating and score

See how to improve this property's energy efficiency.

Energy rating Score 92+

the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales: • the average energy rating is D

Properties get a rating from A (best) to G (worst) and a score. The better

• the average energy score is 60

Features in this property Features get a rating from very good to very poor, based on how energy

condition.

Roof

performance

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect. **Description Feature** Rating

efficient they are. Ratings are not based on how well features work or their

Wall Solid brick, as built, no insulation Very poor (assumed)

Roof room(s), insulated (assumed)

Primary energy use		
Secondary heating	None	N/A
Floor	Solid, no insulation (assumed)	N/A
Lighting	Low energy lighting in 94% of fixed outlets	Very good
Hot water	From main system	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Main heating	Boiler and radiators, mains gas	Good
Window	Fully double glazed	Good

About primary energy use

square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend £707 per year on heating, hot

This is **based on average costs in 2022** when this EPC was created. People

living at the property may use different amounts of energy for heating, hot

You could **save £115 per year** if you complete the suggested steps for

The primary energy use for this property per year is 148 kilowatt hours per

water and lighting in this property. These costs usually make up the majority of your energy bills.

improving this property's energy rating.

water and lighting.

Heating this property Estimated energy needed in this property is:

Impact on the environment

dioxide (CO2) they produce each year.

An average household produces

• 9,082 kWh per year for heating

• 2,288 kWh per year for hot water

This property's environmental impact rating is C. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon

Carbon emissions

changes. This will help to protect the environment.
